

## WATERPROOFING

# NERO COAT

A Water based compound based on Styrene Butadiene copolymer with high bonding primer. A chemical that is applied after SUPER COAT waterproof and form damp-proof membrane.

<b>Thickness</b>	:0.3mm
<b>Toluene</b>	:Softens the material
<b>Tensile strength</b>	:3-4 N/mm <sup>2</sup>
	Elongation to break 380%
	1mm to 2mm crack bridging.
<b>Hardness</b>	: 38 Flexible Above -8°C
<b>Touch Dry time</b>	: 15 minutes*
<b>Application:</b>	Sandwich structure before laying tiles, granite, marble, etc

<b>Pack:</b>	10ltr
<b>Coverage*:</b>	300sq ft./10ltr/250 micron /2coat*
<b>Color:</b>	Black
